Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 27 November 2001.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

3. Claims 1-10 are rejected under 35 U.S.C. 103(e) as being obvious over US Patent 6,284,198 to Kirolos et al in view of US Patent 4,668,714 to Morita et al.

Kirolos et al disclose a self appearing warning device for use as a colorimetric dosimeter in indicating exposure to radiation. The embodiment of the device shown at figure 7 comprises an indicating region (2) and identification mark (8). The indicator layer absorbs radiation. The identification mark provides a warning as to the exposure to radiation by changing colors in the presence of radiation. Figure 13 shows various marks, including alpha numeric characters and symbols. The mark can be printed or coated onto the substrate.

Kirolos et al differ from the instant invention in that the indicator is not disclosed as containing alanine and a binder.

Art Unit: 1743

Morita et al teach a dosimeter for indicating exposure to radiation. The dosimeter is comprised of alanine and contains an alanine binder. The alanine binder may be a synthetic rubber, such as urethane. Morita et al teach that the alanine dosimeter provides accurate simple measurement of absorbed doses of ionizing radiation. It would have been obvious to one of ordinary skill in the art to use the alanine/binder dosimeter composite as the indicator in Kirollos et al to provide a device for detecting radiation that is simple, yet accurate.
